

# WASP Sponsorship Orientation Guide

---

## Founding Strategic Partner Brief Institutional Sponsorship Opportunity Overview

---

### 1. Strategic Vision & Institutional Role

WASP (Worldwide Anonymous Security Protocol) represents a foundational new layer of public digital infrastructure—built from the ground up to restore trust, equity, and ethical agency to global systems.

This platform is being developed in partnership with GT-Trust, a public-benefit R&D fund, and Green-Tank, a global policy think tank committed to decentralized governance, ethical AI, and digital sovereignty.

The Founding Strategic Partner Tier is not an investment vehicle. It is a sponsorship opportunity for mission-aligned institutions to support the implementation and global adoption of WASP's open-source, transparent, and values-driven governance model.

This opportunity tier is specifically designed for:

- Fortune 500 leadership teams seeking alignment with trust-based digital ecosystems
- Academic research institutions advancing AI governance, digital identity, or grassroots democratic mobilization technologies
- Philanthropic and policy foundations investing in post-surveillance infrastructure reform

By becoming a Founding Strategic Partner, your organization signals long-range alignment with the future of ethical digital systems and contributes to the development of trust-anchored digital infrastructure accessible to all.

---

### 2. Impact Alignment & Sponsorship Benefits

Unlike traditional investors, Strategic Partners do not receive TAT holdings or financial returns. Instead, their role is participatory, reputational, and catalytic.

### Strategic Sponsorship Includes:

- Early access to GT-Trust & Green-Tank whitepapers, internal roadmaps, and strategic briefings
- Invitations to roundtable forums on digital governance, infrastructure equity, and system design
- Institutional access to live MVP rollout dashboards (read-only) for real-time transparency
- Recognition as a Founding Strategic Partner across all donor transparency reports and impact summaries

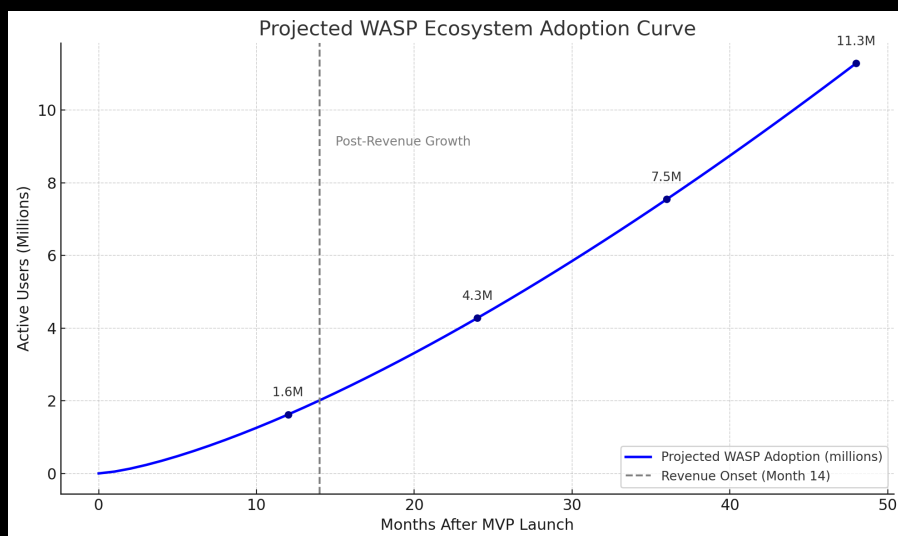

Most importantly, this sponsorship advances your institution's strategic objectives by embedding it within the governance and development of an ecosystem designed to serve the public good and our planet—without commercial interference or exploitative incentives.

---

## 3. Long-Term Strategic Relevance

Green-Tank and GT-Trust are committed to creating a system where:

- Democracy and transparency scale globally through open governance protocols
- Surveillance capitalism is replaced by consent-based data practices
- Public institutions lead, rather than follow, in the ethical integration of digital systems

By aligning with WASP as a Founding Strategic Partner, your institution:

- Strengthens its mission to support secure, equitable infrastructure
  - Contributes to frameworks that influence international standards and legal models
  - Becomes a quiet but foundational voice in a system designed to empower generations
- 

## How to Confirm Sponsorship

Founding Strategic Partner status is available to a limited number of aligned institutional entities during this phase.

Sponsorship is considered a non-refundable investment in a mutual goals-aligned technical infrastructure. We are currently accepting sponsorship offers ranging from \$250,000 to \$999,999 directly through our online payment portal.

Organizations interested in alternate arrangements or larger-scale, customized involvement may also submit proposals or initiate private discussions.

To initiate the partnership process, please visit: [green-tank.org/moon-shot](https://green-tank.org/moon-shot)

Or contact: [partners@green-tank.org](mailto:partners@green-tank.org)

Together, we can build the systems future generations will inherit. The future has yet to be written...
