

WASP Investor Orientation Guide

Founding Momentum Investor Access Investment Tier Breakdown & Timeline Overview

1. Tier Overview: Momentum Access (\$50,000 – \$149,999.99 USD)

As a Founding Momentum Investor, your participation anchors the scalable expansion phase of the WASP MVP platform and ensures you're positioned to benefit from mid-phase adoption acceleration and early network effects.

This tier is ideal for strategic early movers seeking:

- Substantial ROI through token-based profit-sharing
- Voting influence on infrastructure, governance, and DAO-level policy
- Priority visibility into financial dashboards, development phases, and future DAO proposals

Minimum Investment: \$50,000 USD

Maximum Investment: \$149,999.99 USD

Token Allocation: 1:1 TAT per USD invested (non-transferable pre-revenue)

TAT ROI Exit Options: 3x (manual), 5x (manual), 10x (automatic)

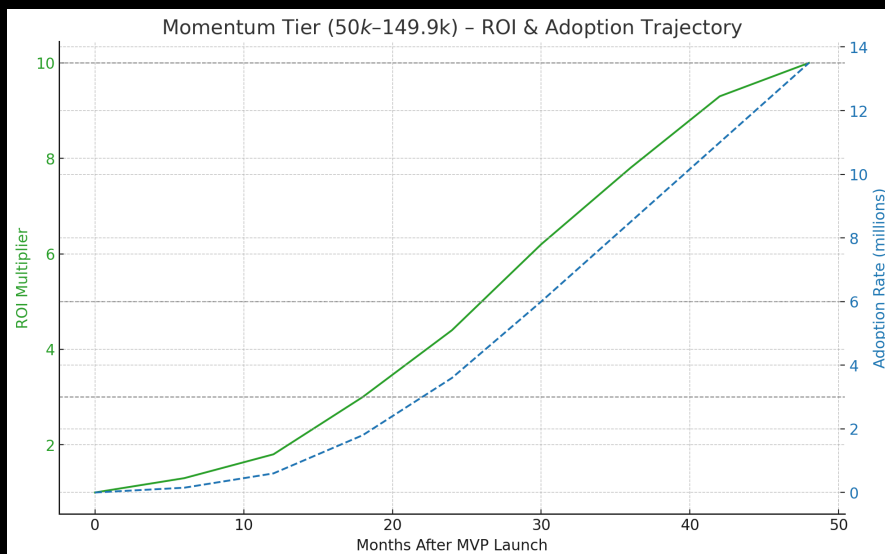

Status: Mid-Tier Founding Investor Access (Priority Phase Allocation)

2. Profit Exit Structure & Strategic Access

Momentum Investors receive priority token exposure as the WASP MVP enters Phase II. ROI exits for this tier are accelerated due to greater TAT allocations and earlier platform scaling.

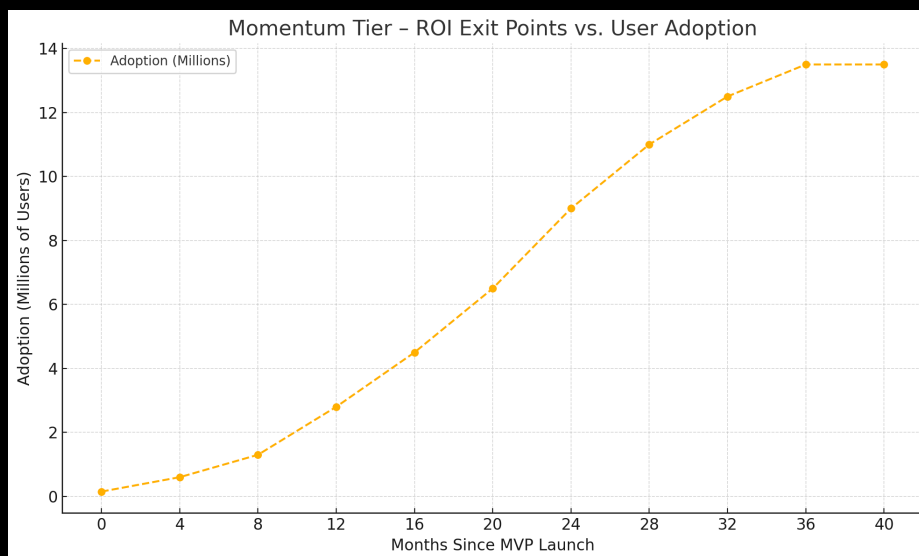

Exit Pathways:

- 3x ROI (Optional Exit) – ~14–16 months post-MVP launch
- 5x ROI (Optional Exit) – ~26 months post-MVP launch
- 10x ROI (Mandatory Exit) – ~37 months post-MVP launch

Estimated Timelines:

- 3x Exit: ~15 months post-MVP launch
- 5x Exit: ~27 months post-MVP launch
- 10x Exit: ~38 months post-MVP launch

Momentum Tier investors benefit from:

- Early treasury dividend access post-revenue
- DAO-level voting on fund allocations and product governance

- Direct access to operational dashboards, phased rollouts, and NTAT conversion reports
- Priority invites to GT-Trust partner briefings, think-tank research previews, and long-range compliance models

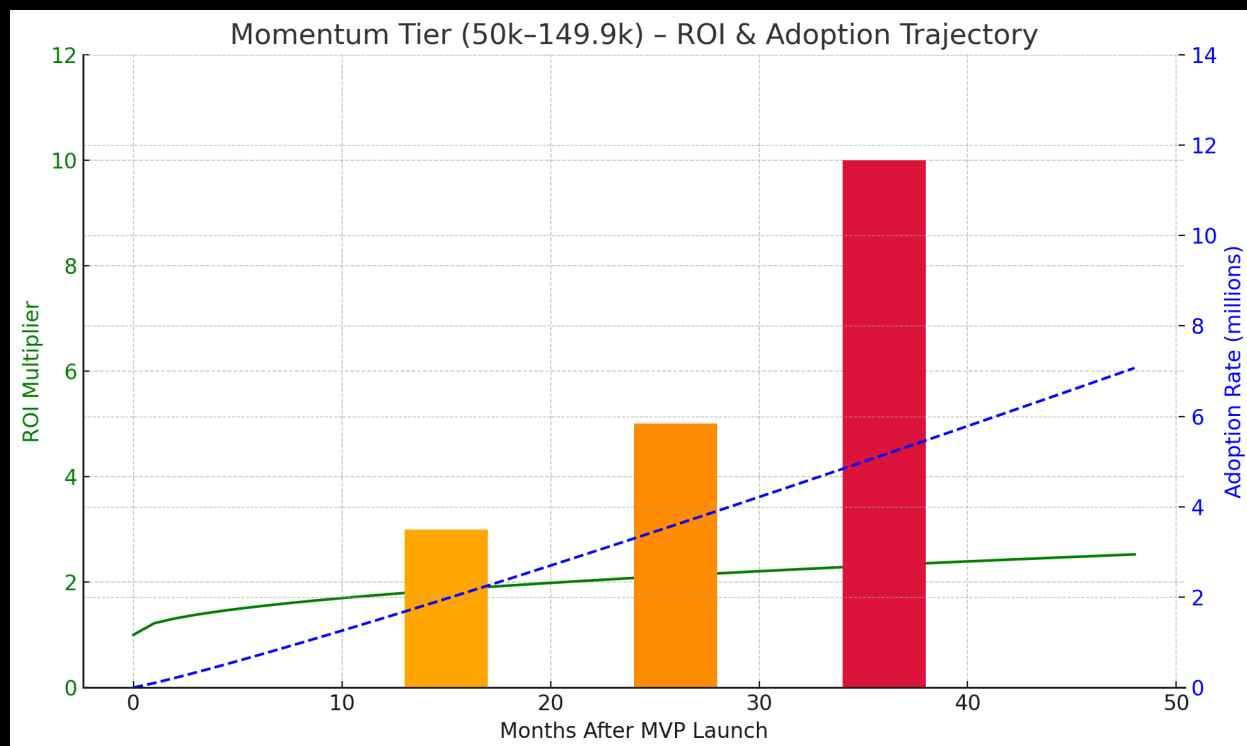

Your investment supports not only technical infrastructure, but long-term ethical control of public digital systems.

3. Visual Reference: ROI & Adoption Trajectory Chart

Included in your investor pack is a custom chart showing:

- Projected ROI growth over time
- Expected user adoption rates (in millions)
- Clearly marked ROI exit bars for 3x, 5x, and 10x returns

This visual clarifies how user growth and adoption correlate directly to profit-sharing triggers and automated exits.
